Research Partnerships Between Pacific Northwest National Laboratory and TAMIDS

Michael Henry is a Senior Data Scientist at Pacific Northwest National Laboratory and holds a Joint Appointment at Texas A&M. In this talk, he will discuss his current research at PNNL, his involvement with Texas A&M, as well as the broader portfolio of shared research between the two organizations. This talk will discuss research and potential opportunities to collaborate on funded research between the two organizations.

Michael Henry

Senior Data Scientist
Pacific Northwest National Laboratory

Date: November 3, 2022
Time: 2-3 p.m. US Central Time
Location: Blocker 220 (in person)
Online: 998 4499 3279 (ID) & 724615 (PWD)
Faculty host: Simon Foucart, TAMIDS/MATH

Biography

Michael J. Henry is a Senior Data Scientist at Pacific Northwest National Laboratory. He holds a B.S. in Computer Engineering from Purdue University and a M.S. in Computer Science from Georgetown University. He also holds a Joint Appointment at Texas A&M University, and is currently located out at the RELLIS campus as the Director of Experiential Learning as part of the Human-Machine Ecosystem Laboratory. Michael's research interests include large-scale image retrieval, generative adversarial networks, operational machine learning, big data analytics, and deployable and assured AI.
