Capstone Project

Partner with purpose.
Solve with Data

Sponsor Requirements

- Provide a liaison to meet with the team regularly
- Submit an evaluation of the team
- Financially support the project and provide the supplies necessary

Timeline

- **June - Aug:** Summary & Data Submission
- **Aug:** Student Project Selection
- **Sept-Nov:** Projects Underway
- **Dec:** Final Project Presentation/Report

From a Past Sponsor:

"Working with TAMIDS students on our capstone project brought fresh perspectives, innovative solutions, and a direct line to talented, data-driven problem solvers."

Program Cost

\$3,000

Submit Project Proposal

Capstone Course Projects pair companies with student teams who apply data science, machine learning, or AI to real-world problems, ranging from customer insights and process improvement to predictive modeling and strategic analysis. Sponsors define a focused project scope, provide a liaison, and receive actionable, data-driven results. Students gain valuable, hands-on experience solving real world challenges, while building technical expertise, leadership, and teamwork skills. The course offers sponsors fresh perspectives, increased visibility, and a direct connection to emerging talent prepared to contribute from day one.
